Profile 6 - Migration and Diversity

Foreword

This report is the sixth of ten Profile reports examining in more detail the definitive results of Census 2011.

This report looks at diversity in the form of non-Irish nationals living in Ireland, along with foreign languages

spoken and ability to speak English.

This report is the sixth in a series of census reports providing interpretation and analysis of the 2011 census

results. Profile reports 1 to 5 covered population distribution and movements, the age profile of Ireland, the industries and occupations of workers, housing in Ireland and households and families. Other topics will be

industries and occupations of workers, nousing in freiand and nouseholds and families. Other topics will be

covered in future Profile reports to be released throughout the remainder of 2012. A complete list of planned

publications and dates can be found on page 78 of this report.

Web tables

All the data published in this and other reports are available on the CSO web site (at www.cso.ie/census)

where users will be able to build their own tables by selecting the data they are interested in and downloading

them in an easy to use format for their own analysis.

Small area data

Small area data is an important output from the census and the complete set of tables for all the standard

layers of geography, such as ED and Local Electoral Area, as well as tables for the new geographic unit,

called Small Areas, are published in our interactive mapping application (SAPMAP) on the CSO website.

Interactive maps

In co-operation with the All Ireland Research Observatory (AIRO) summary census data is now available in

thematic maps for Electoral Districts and all Small Areas. Combined with the release of the SAPS data in our

new easy to use interactive mapping application, these new developments bring census data alive in a fresh

and exciting way making it easier to access for all. Just follow the link from the website.

Nationality

Non-Irish nationals up 143% in 9 years

A question on nationality was asked for the first time in Census 2002 revealing information about the nationality make-up of the Irish population. In the subsequent censuses of 2006 and 2011 the same question was asked therefore providing a data series on nationality over the period 2002 to 2011.

The number of non-Irish nationals in 2002 was recorded at 224,261 persons. By 2006 this had increased to 419,733 representing an increase of 87 per cent. The growth in the number of non-Irish nationals has continued, albeit at a slower pace and their number stood at 544,357 at the time of the 2011 Census.

Dominant non-Irish nationalities

The main non-Irish nationalities resident in Ireland in April 2011 are shown in Table A.

Large Polish increase

The nationality with the largest increase between 2006 and 2011 was the Polish nationality. Polish residents increased from 63,276 persons in 2006 to 122,585 in 2011, a 59,309 increase over the period. Lithuanian residents increased by 12,055 persons to stand at 36,683 persons in April 2011. Other large increases over the period occurred in the number of Romanian, Indian, Latvian and Hungarian populations living in Ireland. A small number of nationalities recorded a drop over the 5 year period since 2006, most notably the US and Australian nationalities.

Nationalities in Ireland, 2011

Remarkable diversity in Ireland 2011

There were a total of 544,357 non-Irish nationals living in Ireland in April 2011, representing 199 different nations. While the vast majority of these people were from a small number of nationalities there was remarkable diversity in the range of nations identified in Census 2011 as can be seen in Table B below.

The 12 nations with over 10,000 residents accounted for 74.4 per cent of all non-Irish nationals in 2011. A further 34 nations with between 1,001 and 10,000 residents accounted for 20.6 per cent of the non-Irish nationals in Ireland. The map of the world on the page opposite shows the numerous countries of origin of Ireland's non-Irish nationals in 2011.

2011 RESULTS

Country of origin of non-Irish nationals living in Ireland

Nationality by county

Figure 1 Percentage of non-Irish nationals by county, 2011

Non-Irish nationals at county level

In terms of absolute numbers, the administrative counties of Dublin City (88,038 persons), Fingal (49,517) and Cork County (42,886) had the highest numbers of non-Irish nationals in 2011. Leitrim (3,703) and Longford (5,477) had the lowest numbers of non-Irish nationals.

As a proportion of its resident population, Galway City was the most multi-cultural with 19.4 per cent of its residents recorded as non-Irish. Of these, Polish nationals were dominant. Just over 18 per cent of the resident population of Fingal were non-Irish with Polish, UK nationals, Nigerians, Lithuanians and Latvians making up more than half of these persons in 2011. One in six of Dublin city residents was a non-Irish national with Polish, UK, Romanian, Indian, Chinese and Brazilian nationals combined accounting for 45 per cent of these.

Donegal had the smallest proportion of non-Irish nationals (8.1%) in 2011. More than half of these were UK nationals.

Changes at county level

Over the 5 year period since 2006, Fingal (+15,151 persons) saw the largest increase in its non-Irish nationals. Dublin City (+14,049), South Dublin (+9,784) and the eastern counties of Kildare (+6,015) and Meath (+5,354) similarly experienced large increases in their non-Irish nationals. In the south west of the country, Cork County (+10,518) recorded a significant increase in its non-Irish nationals since 2006.

Table pages 38 - 39

It's a fact!

64.8%

The percentage increase in the number of non-Irish nationals living in Laois since April 2006 – the largest relative increase for counties

Nationality at town level

Towns of high non-Irish nationals

Looking at the nationalities of residents living in census towns (defined as having 50 or more occupied dwellings - see Appendix 2) in April 2011 revealed that Ballyhaunis had the highest proportion of non-Irish nationals at 41.5 per cent. This compared to an average rate of 14.9 per cent for all towns in 2011. Table C shows the 7 towns where more than 30 per cent of the population were non-Irish.

More than one in four

Overall, there were 25 towns where more than one in four residents were non-Irish nationals, Cavan being the largest in this group.

More than one in five

A further 35 towns had between 20 and 25 per cent non-Irish nationals. Swords in County Dublin was the largest town in this group with 21 per cent non-Irish.

Of the cities, Galway City and its suburbs had the highest proportion of non-Irish nationals at 19.2 per cent.

Map 2 Number of towns within each county with 20 per cent or more non-Irish nationals

Table C Towns with the highest percentage of non-Irish nationals, 2011

Nationality and age

Figure 2 Irish and non-Irish nationals, 2011 93 90 **Males Females** Age 1.0 1.0 2.0 1.5 0.5 0.0 0.5 1.5 2.0 ■ Non-Irish Irish

Non-Irish sex and age structure

Non-Irish nationals were split fairly evenly by gender in April 2011 with 271,864 males and 272,493 females. In 2002 and 2006 the number of males exceeded the number of females among the non-Irish national community.

The population pyramid above shows the distribution in 2011 of both the Irish and non-Irish nationals by sex and single year of age. The differences are stark.

Non-Irish in those aged 22 to 44 is clearly evident with this age group accounting for 60 per cent of all non-Irish nationals in 2011, compared with just 32 per cent for Irish nationals.

The lower numbers of younger and older persons in the non-Irish population compared to the Irish population is also well illustrated. Just under 19 per cent of non-Irish nationals were aged over 44 years compared with 37 per cent for Irish nationals.

Twenty-one per cent of non-Irish nationals were aged under 22 years compared with 31 per cent for Irish nationals in 2011.

Table page 41

It's a fact!

- The peak single year of age for non-Irish nationals living in Ireland in 2011 (20,825 persons).
- The average age of non-Irish nationals in Ireland in 2011. The average age of Irish nationals was 36.7.

Age structure by nationality

Polish nationals

The age pyramids for Polish nationals in 2006 and 2011 below illustrates the change in age structure over the 5 year period. In particular the proportion of Poles aged under 20 doubled from 9.9 per cent in 2006 to 21.2 per cent in 2011, while those aged 20 to 34 shrunk from 72.4 per cent of persons in 2006 to 56.7 per cent by 2011.

The pyramids also highlight the male excess that existed in 2006 when nearly two-thirds of all Poles were male. By 2011 the balance had shifted to 51.7 per cent males and 48.3 per cent females. The biggest change was among the 20-34 age group which decreased from 61.7 per cent male in 2006 to 48.7 per cent by 2011.

Although males remained dominant in the older age groups the gap had narrowed considerably by 2011.

Nigerian nationals

The peak period for Nigerian nationals moving to Ireland was between 2002 and 2006 when numbers increased from 8,969 to 16,300, followed by a smaller increase to 17,642 by 2011. The age distribution of the Nigerian population shows noticeably more children in the 10 to 13 age group and relatively fewer in the younger ages. The dominance of those in their thirties is also clear.

UK nationals

The peak ages for UK nationals resident in Ireland are older than those for Irish nationals in general, while larger proportions at the older age groups are also in evidence.

Nationality and marital status

Slightly higher marriage rate...

Figure 3 shows the marital status of the non-Irish population along with the top 10 non-Irish nationalities in terms of persons aged 15 and over in 2011. Of the 465,788 non-Irish nationals living in Ireland in 2011, just under half (49%) were married; this compares with 47 per cent of the Irish population who were married in 2011.

... and more separated or divorced

The rate of separated or divorced persons was higher amongst non-Irish nationals at 7.9 per cent in 2011 compared with 5.3 per cent for Irish nationals.

The lower rate of widowed persons among the non-Irish national population reflects the characteristic age structure of the migrant population.

Single Chinese and married Indians

More than half of Chinese nationals aged 15 years and over in 2011 were single. On the other hand, Indian nationals were more likely to be married (82.4%). Latvians had the highest rate for separated or divorced persons (14.3%) among the 10 countries in the bar chart and much higher than the average rate for all non-Irish nationals (7.9%).

UK nationals had the highest rate of widowed persons (4.6%) reflecting their older age profile within the non-Irish population.

Table page 42

Change over time

Figure 4 shows the status of non-Irish (excluding UK) nationals.

In 2002, 48 per cent were single. The increase to 51 per cent in 2006 reflects the high inflows of young Europeans since the accession of ten new countries to the EU on 1 May 2004. By 2011 the percentage single had fallen back to 43 per cent.

Figure 3 Marital status of non-Irish nationals aged 15 and over by nationality

4.6% The percentage of UK nationals aged 15 and over who were widowed in 2011

Nationality and household type

Living arrangements – couple with children dominant

Looking at the composition of households headed by non-Irish nationals reveals differences in the living arrangements among different groups. The most prevalent household type among all non-Irish nationals was a couple with children accounting for 34 per cent of households, very close to that of Irish headed households at 35 per cent .

Amongst the nationalities with more than 1,000 persons living in Ireland in 2011, Indian headed households had the largest percentage in this category with just over 60 per cent of their households comprising a couple with children.

Single person households made up 17 per cent of households headed by non-Irish nationals compared with one in four for Irish households, attributed in part to the higher number of older Irish people who lived alone. Amongst the nationalities with more than 1,000 persons living in Ireland in 2011, Somalia had the largest proportion of one person households at 42 per cent, followed by Algeria (32%), Germany (32%) and Spain (31%).

Amongst the nationalities with more than 1,000 persons living in Ireland in 2011, Nigerian headed households had the highest rate of lone parent households at 33 per cent compared with the average of 10 per cent for all non-Irish headed households in 2011.

Non-family households headed by non-Irish nationals averaged 12 per cent overall. This compared to just 5 per cent for Irish headed households. Of the nationalities with more than 1,000 persons living in Ireland in 2011, Saudi Arabian headed households had the highest proportion of non-family households at 33 per cent. Next were Brazilian headed non-family households, which accounted for 31 per cent of all Brazilian headed households.

Large increase in families with children

Significant changes have been recorded in the household composition of private households headed by non-Irish nationals since 2006 (see figure 5) in particular among families with children which increased from 41 per cent of all households in 2006 to 50 per cent in 2011.

Polish, Lithuanian, Latvian, Indian and Filipino headed households all showed increases of more than 20 percentage points in this category over the five years, strong evidence of changing household structure among these groups.

Table page 43

Household composition

Figure 6 Nationalities within households, (top 20 nationalities) 2011

Changes since 2006

Increases in the number of households in most of the above nationalities were recorded in the 5 year period since 2006 in line with corresponding increases in the number of these nationals in the period. In particular, households containing Brazilian nationals increased by 170 per cent in the period, followed by households containing Hungarian (141%) and Polish (114%) residents. Mixed Irish-Brazilian households increased from 409 to 1,444 between 2006 and 2011, a 3.5 fold increase in the period.

Average household size

In 2011, the largest average household size was recorded for Filipino-only households at 2.92 persons. This compares with 2.57 average persons for an Irishonly household. Lithuanian-only households had on average 2.79.

Table page 44

Composition of nationalities within households

Figure 6 analyses the composition of households containing individuals from the top twenty most populated nationalities resident in Ireland at that time of the 2011 census. A three way typology is used:

- Mixed Irish nationality households contain at least one Irish national and at least one non-Irish national;
- Nationality only households contain no Irish nationals and only persons with the same nationality;
- Non-Irish mixed national households contain no Irish nationals and at least two non-Irish nationals from different nationality backgrounds.

Large differences were recorded between the compositions as can be seen in the bar chart opposite.

Mixed Irish-Nigerian households

Of the 8,359 private households that contained at least one Nigerian, 6,416 (or 77%) were categorized as mixed Irish-Nigerian households, with a child identified as the Irish person in a large number of cases. Irish-US national households accounted for 72 per cent of households with US nationals. The lowest rates of mixed Irish nationality households were recorded for households containing Hungarian (20%) and Polish (21%) residents.

All Polish

Nearly 3 out of 4 households (71.2%) containing at least one Polish person contained only Polish persons, the highest of all the main nationalities. Hungarians were second at 62 per cent.

Czech and Slovak nationals

Sharing with other non-Irish was not common among the nationalities listed but for those who did households containing Czech and Slovakian nationals were most likely to share with other non-Irish persons (32 and 29 per cent respectively).

It's a fact!

1.66 The average number of UK nationals per UK national-only households in 2011

1.55 The average number of US nationals per US national-only households in 2011

Born here, born abroad

Figure 7 Irish nationals born abroad by age, sex and place of birth

Most foreign-born Irish were born in the UK

Figure 7 on the left shows the age and sex profile of the 241,221 Irish nationals who were born outside the State. The vast majority (178,945) were born in the UK.

The peak age for Irish nationals who were born in the UK was 42 years, i.e. people born in the late 1960s.

A smaller peak appears for persons in their late teens and early 20s.

A similar pattern emerges for Irish nationals born elsewhere, with large numbers of young adults and of persons in their forties, but relatively few persons in their twenties. Apart from the UK, the countries where the largest numbers of Irish nationals were born were the USA (16,703), Australia (3,220), Canada (2,524) and South Africa (2,440).

Table pages 48 - 49

It's a fact!

8,928 The number of Polish nationals who were born in Ireland

1,316 The number of Irish nationals who were born in the Philippines

Non-Irish nationals born here

There were 25,198 non-Irish nationals who were born in Ireland. Polish nationals were the largest single group, with 8,928 people, followed by Lithuanians (2,018), UK nationals (1,921) and Latvians (1,199).

Figure 8 on the right shows the breakdown by age and sex.

The vast majority were young children, with two thirds of the total aged under five years. A further 11.5 per cent were aged between five and nine years.

By contrast, only 7.2 per cent of non-Irish nationals who were born in the State were aged 40 or over.

Figure 8 Non-Irish nationals born in Ireland aged 0 to 65 by age and sex

At work

Figure 10 Nationalities at work (500+) and persons aged 15 and over, excluding Poland and UK, 2011

Labour force participation

As reported in *This is Ireland, Part 2* there were 268,180 non-Irish nationals at work in Ireland in April 2011 accounting for 15.1 per cent of the the workforce.

Polish and UK workers

Polish and UK nationals dominated the non-Irish workers and accounted for 116,375 workers or 43.4 per cent of all non-Irish national workers.

From all over the world

The remaining 151,805 workers comprised a total of 185 different nationalities. Many had very small numbers of workers with 70 nationalities having 10 or fewer workers.

The graph on the left covers all nationalities other than Irish, Polish and UK and gives the total number of usual residents aged 15 years and over and total workers for nationality groups containing at least 500 workers.

Lithuanian workers numbered 19,753 in 2011 followed by Latvian workers at 10,782.

Indians were the fifth largest group at work in 2011, followed by Romanian nationals, both with over 8,000 workers.

Seven nationalities had between 5,000 and 8,000 workers, while a further 18 had between 1,000 and 5,000 workers.

Table pages 45 - 47

It's a fact!

187

The number of different nationalities who were at work in Ireland in April 2011

Industrial groups

Workers by industry

Non-Irish national workers numbered 268,180 in 2011. These workers were employed in all of the main industries in Ireland but in particular were involved in the Wholesale and Retail trade (46,353 persons), Accommodation and Food Services (38,855), Manufacturing Industries (33,445) and Human Health and Social Work (27,487). The charts below show the top non-Irish nationalities involved in these four industrial sections. As can be seen, the main non-Irish groups such as Polish, UK and Lithuanian nationals predominate.

The top 10 nationalities accounted for more than 70 per cent of all non-Irish national workers in these sectors in 2011. Polish, UK national, Lithuanian and Latvian workers accounted for two-thirds of all non-Irish Wholesale and Retail workers. UK, Indian and Filipino nationals accounted for more than half of all non-Irish workers in the Human Health and Social Work sector.

Figure 12 Students, males and females for some nationalities, 2011

Retired UK nationals

There were 19,619 non-Irish nationals who were retired in Ireland in 2011. This represents 4.2 per cent of the non-Irish nationals aged 15 years and over compared with 13.9 per cent for Irish nationals. The number of retired females (9,913) was slightly higher than the number of retired males (9,706).

By far the largest group of retirees were UK nationals with 14,754 persons or 75 per cent of all non-Irish retirees. The next largest group was German nationals with 826 retirees.

UK nationals also had the highest rate of retired persons in Ireland in 2011 with one in seven (or 14.6%) retired.

High rates were recorded for Dutch (10.7%), US (9.5%) and German (8.1%) nationals.

Students

There were 49,915 non-Irish national students and pupils aged 15 years and over resident in Ireland in 2011 accounting for 10.7 per cent of all non-Irish nationals in this age group. This compared with 11.2 per cent for Irish nationals. The largest group were UK nationals (8,277 persons) followed by Poles (4,586), Chinese (3,533) and Nigerians (2,860).

American continentals accounted for one in four non-Irish national students in 2011. African (22.6%) and Asian (21%) students were next while students with EU nationality (6.9%) had the lowest share.

Participation rates

The student participation rate of non-Irish 19-24 year olds was 32.2 per cent compared with a rate of 41 per cent for Irish nationals. However, within the individual nationalities, this rate varied greatly. The highest rate was recorded for Saudi Arabian nationals (92.3%) albeit with a relatively small number of students (337). This was followed by Malaysian nationals at 87.1 per cent (640 students) and Chinese nationals at 77.9 per cent (1,634 students). Canadian (69.8%), US (64.3%), Filipino (61.9%), Indian (60.6%) and Mauritian (60.4%) nationals also had high education participation rates.

Amongst the largest European nationalities in Ireland, the education participation rate of 19-24 year olds was lowest among Slovakian students (7.2%). Polish students (9.1%) and Hungarian students (9.2%) also had lower than average education participation rates. This reflected the correspondingly high rates of labour force participation amongst these nationalities in 2011.

29.2% The percentage of Canadians in Ireland aged 15 and over who were students in 2011.

The percentage of non-Irish nationals aged 25 years and over who were students in 2011. The corresponding rate for Irish nationals was 1.5 per cent in 2011.

Non-Irish looking after the home

Figure 14 Percentage of women looking after the home/family by nationality, 2011

Men looking after the home

Figure 15 shows the proportion of male nationals looking after the home/family in 2011 for selected nationalities. The highest rate was recorded for Filipino men who accounted for 26.3 per cent of all non-Irish national homemakers in 2011. Males accounted for only 1 per cent of Thai nationals whose economic status was looking after the home or family.

The rate for Irish national males was 5 per cent.

Looking after home or family

The number of non-Irish nationals whose economic status was looking after the home or family was 37,164 accounting for 8 per cent of all non-Irish nationals living in Ireland in 2011. The same rate for Irish nationals was 9.7 per cent.

Females looking after the home

Within the individual nationalities shown in Table 8C, on page 45, the highest proportion of women aged 15 and over looking after the home was recorded for Bangladeshi women at 56.1 per cent (see Figure 14), followed by Pakistani women at 51.2 per cent. High rates were also recorded for Egyptian (45%), Algerian (38%) and Sudanese women (37%). At the opposite end of the scale, Zimbabwean women looking after the home accounted for 6 per cent of all Zimbabwean women living in Ireland.

Among the larger non-Irish groups, 19.6 per cent of UK national women were looking after the home, whilst the rate for Polish women was 11.2 per cent. The rate for Lithuanian women was 8.7 per cent and for Nigerian women was 11.5 per cent. Among Irish women 18.1 per cent were looking after the home or family.

Relatively more non-Irish men looking after the home

The vast majority of the non-Irish nationals looking after the home/family were female, with only 3,035 males in this category. However, males accounted for 8.2 per cent of all non-Irish nationals looking after the home, higher than the corresponding rate for Irish nationals which was 5 per cent in 2011.

Table pages 45 - 47

It's a fact!

14.6% The percentage of non-Irish women aged 15 and over who were looking after the home/family in 2011. The corresponding rate for Irish women was 18.1 per cent.

Socio-economic group

Grouping the population

Socio-economic group (SEG) classifies the entire population into one of ten groups based on the level of skill and educational attainment of the occupation (of those at work, unemployed or retired) while all other persons are classified to the socio-economic group of the person in the family on whom they are deemed to be dependent.

The largest group in 2011 for non-Irish nationals was group D (non-manual workers) accounting for 115,877 persons and representing 21.3 per cent of all non-Irish nationals. The smallest group was group I (farmers) representing just 0.6 per cent.

Figure 16 compares the distribution of Irish and non-Irish nationalities by socio-economic group. Proportionately more Irish nationals were assigned to employers and higher and lower professional groups (35% combined) than were non-Irish nationals (26%). On the other hand, relatively more non-Irish were assigned to non-manual, manual skilled, semi-skilled and unskilled workers (48% combined) compared with Irish nationals (39%).

Figure 17 Socio-economic groups for selected nationalities, 2011

Differences at nationality level

Within the nationalities shown in Table 12, Italians had the highest proportion assigned to employers and managers (20.8%), twice that of the overall non-lrish average of 10.2 per cent and higher than the Irish average of 16.2 per cent.

Higher than average proportions assigned to higher professionals were recorded for Sudanese (48.5%), Egyptian (18.6%) and Pakistani (17.9%) nationals, reflecting the high numbers of medical doctors among these nationalities. Indians and Filipinos had the highest percentages in the lower professional group (which includes nurses and midwives) with 53.2 per cent and 44.3 per cent, respectively.

Relatively high rates of persons assigned to Own Account workers were recorded for Nigerian and Dutch nationals (both 6.7%), and UK nationals (6.6%).

It's a fact!

5% The percentage of Ukrainian nationals classified to agricultural workers in 2011

Nationality and education

Non-Irish more highly educated than Irish

Census 2011 results show that the number of nonlrish nationals living in Ireland who had completed their education was 344,929 in April 2011.

It also shows up differences that existed in the levels of education attained between Irish and non-Irish nationals aged 15-64 (see figure 19 below). For example, 28.7 per cent of Irish nationals who had completed their education were educated up to lower secondary (Junior Certificate or equivalent). The same rate for non-Irish nationals was 12.5 per cent. A technical or vocational qualification was held by 8.3 per cent of Irish nationals compared with 16.2 per cent of non-Irish nationals. At third level, the proportion of non-Irish nationals with a degree or higher was 31.3 per cent compared with 27.1 per cent of Irish nationals.

Figure 19 Levels of education completed (persons aged 15-64), 2011

Figure 18 Levels of education completed by nationality, 2011

Indian nationals highly educated

Figure 18 above shows the breakdown of persons who ceased their education by level of education for the top 10 nationalities living in Ireland in 2011. Of these, Indian nationals had the highest percentage of persons with a third level degree or higher (77.3%). Filipinos (64.5%) and US nationals (55.9%) had similarly high rates. Nationals from Latvia (10.9%), Lithuania (15.5%) and Romania (17.1%) had below average rates.

German nationals had the highest proportion of persons with an advanced certificate/completed apprenticeship in 2011 at 17.3 per cent and much higher than the average for all non-lrish nationals (7.2%).

Latvians (30.2%) and Poles (28.8%) had the highest proportions of persons with a technical or vocational qualification.

Table pages 52 - 53

Field of study

The non-Irish skill set

Of the total non-Irish nationals aged 15 and over who had completed their education 210,243 persons answered the new question on their main field of study. This represented a response rate of 61 per cent and compares with a 48 per cent response rate for Irish nationals.

The most popular category for non-Irish nationals was Social Sciences, Business and Law with 57,292 persons holding a qualification in this area. This category represented 27 per cent of all respondents. This category was also the most popular among the Irish national population for whom the completion rate was 28 per cent of all relevant respondents. Engineering, Manufacturing and Construction was the next most popular amongst the non-Irish with 47,539 persons representing 23 per cent of all non-Irish respondents. This was slightly higher than the same rate for Irish nationals (19%).

Within Social Sciences, Business and Law, the field of Accounting and Taxation accounted for 4.8 per cent of respondents. Two-thirds of these were female.

Building and Civil Engineering qualifications accounted for 5.1 per cent of all non-Irish respondents in 2011 with 95 per cent of these male.

Incoming migrants

Figure 21 Irish and non-Irish returned migrants by year of return to Ireland (Republic)

Persons who lived abroad

Census 2011 revealed that there were 892,370 residents (aged 1 year and over) who had previously lived outside of Ireland (Republic) for one year or more. Of these, 536,386 were Irish nationals (60.1%) and 351,905 were non-Irish nationals (39.4%). The graph above shows the year of arrival into Ireland for both Irish and non-Irish nationals for the years 1980 to 2010. When analysing these results, it must be borne in mind that a high percentage of residents who were born abroad failed to answer the question on previous residence abroad – repeating patterns observed in 2006.

Returning Irish

Returning Irish nationals have always been in evidence, averaging around 5,000 persons per year in the early 1980's and then increasing to reach a high of 15,245 in 1990. After small declines from this high in the early 1990's, the annual inflow increased sharply between 1994 and 2000 to reach a maximum inflow of 23,448 persons in the year 2000. Since then annual inflows have been decreasing with an average inflow of around 15,000 persons in the 2006-2010 period.

Incoming non-Irish

The graph shows that the flow of non-Irish nationals into Ireland had been small over the period 1980 to 1988 averaging 800 persons annually. Since then the numbers have been steadily increasing year on year and in particular over the period 2004-2006 when a high of 39,448 persons arrived in Ireland in 2006. Since then the number of non-Irish nationals arriving in Ireland has been decreasing but was still significant at 20,716 persons for the year 2010.

Foreign languages

2011 PESULTS

It's a fact!

The number of separate languages coded in the 2011 census

Languages spoken at home

As already reported in *This Is Ireland, Part 1* 514,068 residents spoke a language other than Irish or English at home in 2011.

Of these 145,919 were Irish nationals. French (41,243 persons), German (16,160) and Spanish (12,590) were the most common languages spoken in Irish homes reflecting the most popular foreign languages taught in Irish schools.

Languages spoken by non-Irish

Non-Irish nationals who spoke a language other than English or Irish at home amounted to 363,929 persons in 2011. The graphs in figure 22 show the most common languages spoken by nationals from the four continents of Europe, Asia, Africa and America.

European nationals

Amongst European nationals living in Ireland in 2011, Polish was the most common language by far with 112,811 speakers, followed by Lithuanian, Russian, Romanian and Latvian.

Asian nationals

Amongst Asian nationals, Filipino (including Tagalog) was the most common language spoken at home, followed by Chinese (including Mandarin and Cantonese), Malayalam (Indian), Urdu (Pakistani) and Hindi (Indian).

African nationals

Amongst African nationals Yoruba (Nigerian) was the most common language spoken, followed by French. Arabic, Igbo (Nigerian) and Afrikaans also featured strongly.

American nationals

Amongst American nationals Portuguese (7,167) was the most common language spoken predominantly in the homes of Brazilian nationals. Spanish, French, Polish and German were the next most common languages spoken.

Languages across borders

In terms of persons speaking a language other than that of their own country, French was the most common language in use followed by Spanish, German, Italian, Arabic, Polish and Russian.

Table page 65

Figure 23 Ability to speak English by year of arrival in Ireland

Spoken English

Non-Irish nationals ability to speak English

The question on ability to speak English is only asked of persons who speak a language other than English or Irish at home. The graph on the left charts this ability against year of arrival into Ireland for the 260,999 non-Irish nationals who lived abroad (for at least one year) and spoke a language other than English or Irish at home.

Year of arrival

The improvement in ability over time spent in Ireland is clearly illustrated. Of the non-Irish nationals who arrived in Ireland in 1990, over three-quarters indicated that they spoke English very well in April 2011, with barely one in twenty indicating not well or not at all.

In contrast, for those non-Irish who arrived in 2010 just over one in three (37%) spoke English very well, while 23.7 per cent could not speak English well or at all.

Age and ability

Of the group examined above 26,919 were aged under 15.

Their ability to speak English exceeded that of their adult counterparts with 59 per cent indicating they could speak English very well, compared with 48 per cent of the adult (aged over 14) group.

It's a fact!

47.7% The percentage of non-Irish nationals who had lived abroad and spoke a foreign language at home who spoke English very well

The percentage of Nigerians who spoke English very well

30.6% The percentage of Poles who spoke English very well

English difficulty and nationality

Among the group referenced above, Lithuanian nationals had the highest proportion who could not speak English well or at all (29.9%). This compared to the average of 16.6 per cent for all non-Irish nationals who lived abroad and spoke a foreign language at home.

Somalian (29.5%), Latvian (28.8%), Polish (24.5%), Brazilian (24.3%) and Chinese (23.9%) nationals also had higher than average rates of residents who could not speak English well or at all.

Table page 66

Recent immigrants

Arrivals since April 2010

The census results show that of the 53,267 persons who arrived in Ireland in the year prior to April 2011, 33,340 were non-Irish nationals. Most of the arrivals were of European nationality with the largest number being Polish nationals (4,112) followed by UK nationals (4,072). American continental nationalities outnumbered Asian and African nationalities with the arrival of 2,396 Brazilians worthy of note.

Mainly 25-34 years old ...

Over a third of these arrivals who were non-Irish nationals were aged between 25 and 34 years and over two thirds were between the ages of 15 and 34.

... and single

Most of these arrivals who were non-Irish were single persons (59.7%) and 22.7 per cent were married. Single Brazilians accounted for 87 per cent of all Brazilians who arrived in the year prior to the census.

Family arrangements

Many recent arrivals were living in non-family households (9,604 persons) followed by families consisting of a couple with children (6,022) and a couple only (4,465).

Figure 25 Recent arrivals by age group

Figure 26 Non-Irish students who arrived in Ireland in the year prior to April 2011

Students arriving

Of the non-Irish immigrants who arrived in Ireland in the year before the census, 23.4 per cent (6,846 persons) were students. Of these, over half were aged 19-24 and a further 31 per cent were over 24.

Brazilian students (1,239) were the largest group, followed by French (594), Chinese (580), US national (452) and Spanish (358) students.

APPENDICES

Appendix 1

Background Notes

A Census of Population was taken on the night of Sunday, 10 April 2011 in accordance with the Statistics (Census of Population) Order 2010 (S.I. No. 207 of 2010)¹. This report is the sixth in a series of profile reports and looks at diversity in Ireland.

Coverage of the Census

The census figures relate to the *de facto* population i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 10 April 2011, together with all persons who arrived in that area on the morning of Monday, 11 April 2011, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census Night as well as those in residence, while usual residents temporarily absent from the area are excluded.

The date of the census was chosen to coincide with a period when passenger movements were at a minimum and, consequently, the figures closely approximate to those for the normally resident population. Members of the Defence Forces who, on Census Night, were serving abroad with the United Nations were excluded from the enumeration.

Conduct of the Census

A temporary field force consisting of 6 Census Liaison Officers, 44 Regional Supervisors, 438 Field Supervisors and some 4,854 part-time Enumerators carried out the census enumeration. During the four weeks before Census Day the enumerators entered details in respect of 2 million private residences and communal establishments in their enumerator record books. They simultaneously delivered blank census questionnaires to 1.65 million of these dwellings that were expected to be occupied on Census Night. Approximately 290,000 residences were vacant at the time of the census, while in the remaining cases the household was either enumerated elsewhere or temporarily absent from the State. The collection of completed questionnaires took place between Monday 11 April and Friday 13 May, 2011.

The Central Statistics Office (CSO) wishes to record its appreciation of the public-spirited cooperation received from households and the work carried out by the census field force.

¹ The Statistics (Census of Population) Order 2010 was made by the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act 1993 (No. 21 of 1993).

Appendix 2

Definitions

Census Towns

From 1971 to 2006, Census towns were defined as a cluster of fifty or more occupied dwellings where, within a radius of 800 metres there was a nucleus of thirty occupied dwellings (on both sides of a road, or twenty on one side of a road), along with a clearly defined urban centre e.g. a shop, a school, a place of worship or a community centre. Census town boundaries were extended over time where there was an occupied dwelling within 200 metres of the existing boundary.

To avoid the agglomeration of adjacent towns caused by the inclusion of low density one off dwellings on the approach routes to towns, the 2011 criteria were tightened, in line with UN criteria.

In Census 2011 a new Census town was defined as being a cluster of 50 or more occupied dwellings, with a maximum distance between any dwelling and the building closest to it of 100 metres, and where there was evidence of an urban centre (shop, school etc). The proximity criteria for extending existing 2006 Census town boundaries was also amended to include all occupied dwellings within 100 metres of an existing building. Other information based on OSi mapping and orthogonal photography was also taken into account when extending boundaries. Boundary extensions were generally made to include the land parcel on which a dwelling was built or using other physical features such as roads, paths etc.

Legal town boundaries are defined by legal statute and these were strictly applied. Extensions to the Environs of legal towns were constructed using the 100 metre proximity rule applied to Census towns.

102 new census towns were created for the 2011 Census.

Historically for the censuses of 1926 to 1951 a census town was defined simply as a cluster of twenty or more houses and the precise delimitation of the town was left to the discretion of the individual enumerator concerned. As part of the general review of towns for the 1956 Census, the boundaries for the census towns were drawn up in consultation with the various Local Authorities applying uniform principles in all areas of the country. The definition of a census town was changed at the 1956 Census, from twenty houses to twenty occupied houses; this definition was also applied at the 1961 and 1966 Censuses.

Aggregate Town and Aggregate Rural Areas

The term Aggregate Town Area refers to towns (including environs of legal towns) with a total population of 1,500 or more. The term Aggregate Rural Area refers to the population outside Aggregate Town areas and includes the population of towns with a population of less than 1,500 persons.

Private Household

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat or bedsitter (see question H1 on the second page of the census form).

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on Census Night (see question H1 on the second page of the census form).

Size of Household

The number of persons in a household consists of the total number of persons usually resident there on the night of Sunday, 10 April 2011, including those absent from the household for less than three months. Visitors present in the household on census night are excluded.

Household Reference Person

The reference person in each private household is the first person in the household identified as a parent, spouse, cohabiting partner or head of a non-family household containing related persons. Where no person in the household satisfied these criteria, the first usually resident person was used as the reference person.

For the purposes of expressing the household reference person in simple terms for the reader, the terms *head of household* or *householder* are sometimes used instead of the household reference person in this report.

Family Units

A family unit or nucleus is defined as:

- (1) a husband and wife or a cohabiting couple; or
- (2) a husband and wife or a cohabiting couple together with one or more usually resident nevermarried children (of any age); or
- (3) one parent together with one or more usually resident never-married children (of any age).

Family members have to be usual residents of the relevant household.

The determination of household and family composition is based on responses to the question on the census form dealing with relationships within the household.

Industry

In Census 2011 industry is coded using NACE – the General Industrial Classification of Economic Activities within the European Communities. The current version, NACE Rev. 2, is a 4-digit activity classification that was adopted in 2006 and is a revision of the version originally published by Eurostat in 1970. The previous version, NACE Rev.1, was in use in the censuses of 2002 and 2006. To aid in the comparison of data from both censuses, industry has been dual-coded in 2011, i.e. coded to both NACE Rev.1 and NACE Rev.2

NACE Rev 2 is a hierarchical classification, with 88 Divisions at 2-digit level, 272 Groups at 3-digit level and 615 Classes at 4-digit level. The NACE Rev 1 classification is also hierarchical, with 62 Divisions at 2-digit level, 224 Groups at 3-digit level and 514 Classes at 4-digit level. The NACE Rev.2 classification is shown in Appendix 3.

The industry in which a person is engaged is determined (regardless of their occupation) by the main economic activity carried out in the local unit in which he or she works. If, however, the local unit provides an ancillary service to another unit in the business (e.g. administration, storage, etc.) then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual.

Appendix 2 (contd.)

A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term "sector of economic activity". The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons, the nature of their own business or profession.

Socio-economic group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition, a residual group entitled. "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation (coded using Soc90) and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status.

Persons looking after the home/family or at school/college, who are members of a family unit, were classified to the socio-economic group of another person in the family unit using a priority table based on the relationships within the family. Thus, if the reference person² of a family was at work, unemployed or retired, other persons were assigned to his/her socio-economic group. If the reference person was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.), they were assigned to the socio-economic group of the other parent, spouse or cohabiting partner in the family unit. If there was no such spouse or partner or if the spouse, in turn, was neither at work, unemployed or retired, they were assigned to the socio-economic group of a working son/daughter. If there were no persons in the family unit with a socio-economic group then they were assigned to the **unknown** socio-economic group. Other persons looking after the home/family or at school/college who were not members of a family unit, such as relatives of the reference person (e.g. widowed grandparents, etc.) were assigned a socio-economic group using the above method. Unrelated persons or persons living alone who are looking after the home/family or at school/college were assigned to the **unknown** group.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

² The reference person in each private household is the first person identified as a parent, spouse or cohabiting partner in the first family in the household. Where no person in the household satisfies these criteria, the first usually resident person is used as the reference person.

Appendix 5

Census 2011 Questionnaire

The attached extract is taken from the household form used in the 2011 Census. The household form covers 6 persons and consists of 24 pages. The attached extract covers persons 1 and 2 only. The layouts for persons 3 to 6 are identical to that for person 2, apart from the relationship question (Q4).

Census 2011

The 2011 Census will take place on Sunday 10 April and will count all the people and households in the country on that night. It is the twenty-fourth census to be held since 1841. The census results will give a comprehensive picture of the social and living conditions of our people and will assist in planning for the future.

What you need to do

Please keep this form in a safe place and complete it on the night of Sunday 10 April, Census Night. You should consult the Explanatory Notes on the back page to assist you in completing the form. Remember to sign the declaration on page 23 and to have your completed form ready for collection by your Enumerator.

Legal obligation to participate

This is a Notice under Section 26 of the Statistics Act 1993. The Census is being taken under the Statistics Act 1993 and the Statistics (Census of Population) Order 2010. Under Sections 26 and 27 of the Statistics Act 1993 you are obliged by law to complete and return this form. Any person who fails or refuses to provide this information or who knowingly provides false information may be subject to a fine of up to €25,000.

Confidentiality is guaranteed

The confidentiality of your census return is legally guaranteed by the Statistics Act 1993. The Central Statistics Office will use the information you provide for statistical purposes only. This includes the production of statistical tables and analytical reports and the selection of samples for some of our surveys.

Your Census Enumerator

Your Census Enumerator will help you if you have any questions about the Census. Please co-operate fully with your Enumerator to help ensure the success of Census 2011.

Thank you for your co-operation.

Gerard O'Hanlon Director General

Who should complete the Census Form?

The householder or any adult member of the household present on the night of Sunday 10 April should complete this form. A separate Household Form should be completed for every household.

A household is:

- one person living alone, or
- a group of related or unrelated people living at the same address with common housekeeping arrangements, meaning they share at least one meal a day or share a living or sitting room.

Do you need additional forms?

If there is more than one household at this address, ask your Enumerator for another Household Form.

If there are more than 6 persons in your household on Sunday 10 April, ask your Enumerator for a blue Individual Form for each additional person.

How to complete your Census Form

- 1. Use a Black or Blue pen.
- 2. Mark boxes like this —.
- 3. If you make a mistake, do this **and** mark the correct box.

Where you are required to write in an answer please use BLOCK CAPITAL LETTERS and leave one space between each word. Continue on to a new line if a word will not fit, for example:

HOTEL RECE PTIONIST

Have your form ready for collection

Your Enumerator will return between Monday 11 April and Monday 9 May to collect your completed form.

If your form has not been collected by 9 May, please return it fully completed to Central Statistics Office, PO Box 2011, Freepost 4726, Swords, Co. Dublin.

Féadfar leagan Béarla nó Gaeilge den fhoirm seo a chomhlánú.

START HERE

H1 What type of accommodation does your household occupy?

Mark — one box only.

A whole house or bungalow that is:

- 1 Detached
- 2 Semi-detached
- Terraced (including end of terrace)

A flat or apartment (including duplexes) that is self-contained:

- 4 In a purpose-built block
- Part of a converted house or commercial building

A bed-sit:

Bed-sit (with some shared facilities e.g. toilet)

A mobile or temporary structure:

A caravan or other mobile or temporary structure

H2 When was your house, flat or apartment first built?

Mark — the year in which first built even if the building was subsequently converted, extended or renovated.

- 1 Before 1919
- 2 1919 1945 inclusive
- 3 1946 1960 inclusive
- 4 1961 1970 inclusive
- 5 1971 1980 inclusive
- 6 1981 1990 inclusive
- 7 1991 2000 inclusive
- 8 2001 2005 inclusive
- 9 2006 or later

H3 Does your household own or rent your accommodation?

Mark — one box only.

- Own with mortgage or loan
- 2 Own outright
- 3 Rent
- 4 Live here rent free

If renting, who is your landlord?

- Private landlord
- 2 Local Authority
- 3 Voluntary/Co-operative housing body

H4 If your accommodation is rented, how much rent does your household pay?

Enter amount to the nearest Euro.

€			•	0	0

Mark — one box only.

- 1 Per week
- 2 Per month
- 3 Per year

H5 How many rooms do you have for use only by your household?

- Do NOT count bathrooms, toilets, kitchenettes, utility rooms, consulting rooms, offices, shops, halls or landings, or rooms that can only be used for storage such as cupboards.
- Do count all other rooms such as kitchens, living rooms, bedrooms, conservatories you can sit in, and studies.
- If two rooms have been converted into one, count them as one room.

Number of rooms

H6 What is the main type of fuel used by the central heating in your accommodation?

Mark — one box only.

- No central heating
- 2 Oil
- 3 Natural Gas
- 4 Electricity
- 5 Coal (including anthracite)
- 6 Peat (including turf)
- 7 Liquid Petroleum Gas (LPG)
- 8 Wood (including wood pellets)
- 9 Other

H7 What type of piped water supply does your accommodation have?

Mark — one box only.

- Connection to a Public Main
- Connection to a Group Water Scheme with a Local Authority source of supply
- Connection to a Group Water Scheme with a private source of supply (e.g. borehole, lake, etc.)
- Connection to other private source (e.g. well, lake, rainwater tank, etc.)
- 5 No piped water supply

H8 What type of sewerage facility does your accommodation have?

Mark — one box only.

- Public sewerage scheme
- 2 Individual septic tank
- Individual treatment system other than a septic tank
- 4 Other sewerage facility
- 5 No sewerage facility

H9 How many cars or vans are owned or are available for use by one or more members of your household?

Include any company car or van if available for private use.

Mark — one box only.

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 None

H10 Does your household have a personal computer (PC)?

- 1 Yes
- 2 No

H11 Does your household have access to the Internet?

Mark — 'Yes' if you have access to the Internet in your home.

- Yes, Broadband connection
- 2 Yes, other connection
- 3 No

ALL PERSONS MUST BE ENUMERATED WHERE THEY SPEND CENSUS NIGHT

Below are two lists. List 1 is for persons present at this address on the night of Sunday 10 April, Census Night. List 2 is for persons who usually live at this address but who are temporarily away on the night of Sunday 10 April. See the Explanatory Notes relating to Question 7 on the back page for guidance in interpreting a person's place of usual residence.

PRESENT PERSONS

- All persons alive at midnight on Sunday 10 April who spent the night at this address.
- Persons who stayed temporarily in the household (i.e. visitors).
- Persons who arrived the following morning not having been enumerated elsewhere.

DO NOT INCLUDE in List 1

- Any person who usually lives at this address but who is temporarily absent on the night of Sunday 10 April. These persons should be listed as being absent in List 2 below.
- Students who were away from home on the night of Sunday 10 April. They should be listed as being absent in List 2 below.
- Babies born after midnight on Sunday 10 April.

TE	thoro are more than 4 persons	

temporarily absent from the household on the night of Sunday 10 April, please ask your Enumerator for guidance.

Explanatory Notes

Question H3 – Does your household own or rent your accommodation?

If you rent your accommodation (box 3), or live in it rent free (box 4), you should also answer the second part of the question 'who is your landlord?'. Select the appropriate box (1, 2 or 3) to indicate whether your landlord is a 'Private landlord', a 'Local Authority' or a 'Voluntary/Co-operative housing body', regardless of whether or not you pay all or part of the rent yourself, or if it is paid on your behalf by the HSE or any other body.

Question H4 – If your accommodation is rented, how much rent does your household pay?

If the HSE or any other body pays part of the rent, only the amount paid by the household should be entered. Enter the amount to the nearest Euro and mark the box corresponding to the period covered e.g. if your household pays a weekly rent of €78.60 enter 79 and mark box 1. If all of your rent is paid on your behalf enter 0 and mark box 1.

Question 4 – Relationship

The relationship question is designed to determine families within households. This includes where there are two or more families in the one household. For example, a household consisting of an adult daughter living with her two parents and her own child would be counted as a two family household.

The example given below shows how the question should be answered for the child in this situation, where the parents are Persons 1 and 2 on the form, the adult daughter is Person 3 and the child is Person 4.

Mark — one box only for each person.

Relationship of PERSON 4 to	Persons 1 2 3				
Husband or wife	1				
Partner (incl. same-sex partner)	2				
Son or daughter	3			-	
Step-child	4				
Brother or sister	5				
Mother or father	6				
Grandparent	7				
Step-mother/-father	8				
Son-/daughter-in-law	9				
Grandchild	10				
Other related	11				
Unrelated (incl. foster child)	12				

Question 7 – Where do you usually live?

This question refers to your place of usual residence at the time of the Census. If you have lived at this address for a continuous period of at least 12 months before Census Night, or have arrived at this address in the 12 month period before Census Night with the intention of staying here for at least one year you should mark box 1 (HERE). If your usual residence is not here but is elsewhere in Ireland (including Northern Ireland) you should mark box 2 and write in your full address. If your usual residence is elsewhere abroad you should mark box 3 and give the country of usual residence.

The general guideline is that a person's place of usual residence is where he/she spends most of his/her daily night rest. The following specific quidelines should be used:

- Those away from home during the week who return to the family home at weekends should consider the family home as their place of usual residence.
- Primary and secondary students who are boarding away from home, and third level students at college or university, should consider the family home as their place of usual residence.
- If a person has spent or intends to spend 12 months or more in an institution then the institution is that person's place of usual residence.
- If a person regularly lives in more than one residence during the year then the place where he/she spends the majority of the year should be chosen as his/her place of usual residence.

Question 8 – Where did you usually live one year ago?

This question is for persons aged 1 year or over. The guidelines in relation to Question 7 also apply to this question. If your place of usual residence one year before the Census was the same as now you should mark box 1 (SAME as now).

Question 9 – Have you lived outside the Republic of Ireland for a continuous period of one year or more?

This question is for persons aged 1 year or over. If your place of usual residence is in the Republic of Ireland and you were either:

- born in this country and lived outside it for a continuous period of one year or more, or
- born abroad and lived outside Ireland for a continuous period of one year or more,

then you should mark box 1 (Yes). You should also write in the year of last taking up residence in this country and the country of last previous residence.

Question 15 — Do you speak a language other than English or Irish at home?

If you do not speak a language other than English or Irish at home you should mark box 2 (No) and proceed to Question 16. This means those who speak only English and/or Irish at home do not have to report on their ability to speak the English language.

Question 16 – Do you have any of the following long-lasting conditions or difficulties?

For the purpose of this question a long lasting condition or difficulty is one which has lasted or is expected to last 6 months or longer, or that regularly re-occurs.

Question 22 – Do you provide regular unpaid personal help for a friend or family member with a long-term illness, health problem or disability?

If you provide regular unpaid help as a carer, regardless of whether or not you are in receipt of Carer's Allowance/Benefit, you should mark box 1 (Yes) and write in the weekly number of hours of caring.

Question 25 – What is the highest level of education/training (full-time or part-time) which you have completed to date?

The categories distinguished in this question follow the National Framework of Qualifications (NFQ). Further details can be found at www.nfq.ie

Further information on FETAC, HETAC, foreign qualifications and all other qualifications in general can be found at www.census.ie

Question 26 – What is the main field of study of the highest qualification you have completed to date?

This question is to capture post-secondary school qualifications only. If you have a number of qualifications, the field of study relating to the highest qualification only should be listed.

Question 27 – How would you describe your present principal status?

You should mark one box only to select the category which you feel best describes your present principal status. If you are on sick leave or maternity leave and intend to return to work at some stage you should mark box 1 (Working).

Question 34 – Address of place of work, school or college

Persons who leave the household to attend work, school or college should supply the full name and address of this place.

For children who attend pre-school facilities (e.g. crèche, kindergarten) outside the home, the full name and address of this facility should be supplied by the person filling in the form.
